# Appendix: CHFC Report, selected excerpt

## Purpose

- \* Since 1979 the CHFC has been required, by law, to submit standards of hospital effectiveness to the Legislature on an annual basis.
- \* To make the effectiveness standards appropriate for different types of hospitals, the Commission has divided California hospitals into eleven basic "peer groups" and established a different effectiveness standard for each group.
- \* The effectiveness standards developed by the Commission are based upon the cost per stay, day, and visit for each hospital.

## Group Composition

- \* The Commission's eleven basic peer groups divide hospitals according to bed size, service complexity, location, teaching and medical care emphasis.
- \* The hospital peer groups are described on pages 4-5 and include:
  - University Teaching
  - Large, Complex
  - Small Urban
  - Urban, Skilled Nursing Emphasis
  - Alcohol-Drug Rehabilitation
  - Acute Psychiatric
  - Non-university teaching
  - Moderate Size
  - Rural
  - Rural Skilled Nursing Emphasis
  - Urban Psychiatric Emphasis
- \* These groups are based upon sixth year disclosure data (fiscal year end dates June 30, 1980 through June 29, 1981).
- \* The establishment of the groups was based on a computer approach called "cluster analysis" which identifies the most distinctive types of hospitals. This approach is described on pages 6-7. Since establishment in 1979 the peer groups have undergone minor changes but have retained their same basic composition.
- \* Appendix G lists all hospitals, alphabetically, and identifies each hospital's peer group assignment and descriptive statistics. Appendix H lists all hospitals alphabetically within peer groups.

## Recent Studies

- \* Extensive studies were conducted recently to determine the potential for improving the peer grouping system.
- \* Two basic changes in the peer grouping system were tested: increases in the number of hospital characteristics used to assign hospitals to peer groups and explicit weighting of selected characteristics. These studies are described in detail on pages 8-21.

Appendix: CHFC Report, selected excerpt

Basic Group	Number of Hospitals 1976-1977	Description
1. Teaching	12	Large hospitals with primary emphasis on teaching.
2. Large, Complex	76	Large and/or complex urban hospitals with primary emphasis on general medical-surgical care.
3. Moderate Complexity	145	Urban hospitals of average size and/or complexity with an emphasis on general medical-surgical care.
4. Small	139	Smaller and/or simpler urban hospital with an emphasis on general medical-surgical care.
5. Rural	69	Rural hospital with an emphasis on general-medical care.
6. Urban Long-term Emphasis	28	Urban hospitals with an emphasis on long-term care in addition to general medical-surgical care.
7. Rural, Long-term Emphasis	10	Rural hospitals with an emphasis on long-term care in addition to general medical-surgical care.
8. Alcohol-Drug Rehabilitation	9	Short-term care and alcohol and drug rehabilitation hospitals with little or no psychiatric emphasis.
9. Moderate Psychiatric Emphasis	27	Hospitals with an emphasis on psychiatric care in addition to general medical-surgical care.
10. Acute Psychiatric	33	Acute psychiatric hospitals.
